

GIMHANI PABODHA

DATA ANALYST | DATA ENGINEER | DATA SCIENTIST

 gimhanipabodha05@gmail.com  +94 701 173 964

PROFESSIONAL SUMMARY

Motivated 3rd-year BSc (Hons) Information Technology student specializing in Data Science at SLIIT, maintaining a GPA above 3.6 and recognized on the Dean's List three times. Experienced in end-to-end data workflows from ETL pipelines and data warehousing to statistical analysis and interactive visualizations alongside full-stack development. Seeking a data-focused internship to apply academic knowledge to real-world problems.

EDUCATION

BSc (Hons) Information Technology — Data Science 2023 – Present

- Sri Lanka Institute of Information Technology (SLIIT)
- Currently in Year 3, Semester 1 (near completion)
 - GPA: 3.6+ throughout the programme
 - Dean's List Award × 3 (awarded to students achieving GPA ≥ 3.7 in a semester)

G.C.E Advanced Level — Physical Science Stream 2022

Mahamaya Girls' School, Kadawatha

- Completed Advanced Level education in the Physical Science stream with a strong foundation in mathematics, analytical thinking, and problem-solving skills. Developed strong academic discipline and problem-solving abilities through science and mathematics-focused studies.
- Combined Mathematics — C
 - Physics — C
 - Chemistry — S

TECHNICAL SKILLS

Languages	Python, Java, JavaScript, C, C++
Backend	Node.js, Express.js, Spring Boot
Frontend	React, Next.js, Tailwind CSS
Databases	MySQL, MongoDB
Data & BI Tools	Power BI, Microsoft Excel, SSIS, SSAS
Core Concepts	Data Warehousing & ETL, Data Visualization, Statistical Analysis, Database Design
Other Tools	Git, VS Code, Android Studio, Figma

PROJECTS

End-to-End Data Warehouse •Data Engineering

SSIS • SSAS • Power BI • Excel

- Designed and built a full data warehouse from scratch on a chosen dataset, including star-schema modelling
- Developed ETL pipelines using SSIS to extract, transform, and load data into the warehouse
- Built OLAP cubes with SSAS and created interactive dashboards in Power BI and Excel for business insights

Statistical Analysis — Learning Engagement & Knowledge Retention

• Data Science

Python · Statistical Methods

- Conducted a full end-to-end statistical study on how learning engagement influences long-term knowledge retention
- Applied hypothesis testing, correlation analysis, and regression modelling to derive actionable findings
- Produced a detailed research report with visualisations summarising key insights

Excel Analytics Dashboard

• Data Analysis & BI

Power BI

- Developed an interactive Power BI dashboard analyzing 9216 patient records from an emergency room dataset.
- Performed data cleaning and transformation using power query.

Fake News Detection Platform

• Machine Learning / NLP

Python · NLP · Machine Learning

- Developed a platform to classify news articles as genuine or fake using NLP preprocessing and ML classifiers
- Implemented text vectorisation, model training, and evaluation pipelines

Smart Campus 360

• Backend / Full-Stack

Spring Boot · Java

- Built a campus resource management system to streamline booking and utilisation of campus facilities
- Designed RESTful APIs with Spring Boot and implemented role-based access control

Ceylon Colony

• Full-Stack Web

Node.js · React · MySQL

- Delivered a production-ready e-commerce web application for a real client
- Handled end-to-end development including UI, backend APIs, database design, and deployment
